-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of species 3, figures 3 and 4 in the reply filed on 1/11/2008 is acknowledged.
2. Claims 18, 22, 25-27 and 30-34 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/11/2008.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 15, 17, 19-21, 23, 24 have been rejected under 35 U.S.C. 102(b) as being anticipated by Moores, 489656. Moores discloses a pin (7) with a stem and a head and a hook (2) attached to the stem, wherein the pin is engageable with the perforations in the strips at the same time the hook is removably encompassing the strips.

Regarding claim 17, Moores discloses an extension that extends from the pin and then attaches to the first hook part.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 28 has been rejected under 35 U.S.C. 103(a) as being unpatentable over Moores, 489656. Moores discloses the stem formed with the hook or welded to the hook (6). The claim requires that the hook be attached to the pin with a screw joint. It would have been obvious to use a screw joint to attach the hook to the pin as an alternate design of making the connection, because it would predictably yield the same results of Moores integrated buckle.

7. Claims 16 and 29 rejected under 35 U.S.C. 103(a) as being unpatentable over Moores, 489656. Moores discloses a pin (7) with a stem and a head and a hook (2) attached to the stem, wherein the pin is engageable with the perforations in the strips at the same time the hook is removably encompassing the strips.

Claims 16 and 29 require that the head have a diameter larger than the diameter of the perforations in the strips. It is old and well known to make the diameter of pin head for attaching two strips together to be larger than the apertures in the strips. The larger diameter prevents the pin head from inadvertently disconnecting from the strips perforations. Therefore, it would have been obvious to make Moores's pin head be larger than the perforations in the strips.
